Subject: Extend Your Firetrol Controller Warranty with FireProCare

Dear Valued Customer,

Firetrol is committed to providing dependable fire pump controller solutions and continued support throughout the life of your equipment. We are pleased to offer an extended warranty for eligible Firetrol fire pump controllers through FireProCare, a preventive maintenance and equipment management platform.

Our standard warranty covers the controller for one year from the date of installation or 18 months from the date of shipment, whichever occurs first.

GTI Fire Protection Systems Corp. Dba Firetrol extends the warranty to 24 months from the date of shipment, provided the controller is connected to FireProCare upon completion of startup.

In addition, connecting your controller to FireProCare provides convenient access to controller information, maintenance records, documentation, diagnostic tools, and other resources, all in one platform.

Connect your eligible Firetrol controller at startup to take advantage of this extended coverage.

For more information, visit www.fireprocare.com.

Sincerely,
The Firetrol Team
